CAREER OBJECTIVE

Aspire to develop a career as a **Front-End Developer**, leveraging strong skills in **HTML, CSS, JavaScript**, and modern frameworks such as **React/Vue.js** to build optimized interfaces and smooth user experiences.
In the next 2-3 years, aim to expand backend knowledge (**Node.js, Golang**) to become a **Full Stack Developer**, capable of handling the entire web application development lifecycle from frontend to backend, contributing to large-scale projects and delivering sustainable value to businesses.

SKILLS

HTML5, CSS3, JAVASCRIPT (ES6+).

FRONT-END: REACTJS,TYPESCRIPT,REDUX TOOLKIT.

GITLAB & GITHUB PROFICIENCY

UI LIBRARIES: MATERIAL UI, ANT DESIGN, MANTINE UI, TAILWIND CSS

MONOREPO (TURBOREPO, NX, PNPM WORKSPACES)

BE: NODEJS,EXPRESS.JS

EDUCATION

University of Transport Technology   2021 - 2025

information technology

Specialization: Information system
- Expected Graduation: good degree

ACTIVITIES

UTT Media Club   T1/2022 - T3/2023

Communication Team Member

Participated in content creation and communication support for club events

WORK EXPERIENCE

3i Technology & Media Company

T9/2024 - T12/2024

FRONT-END DEVELOPER

- Developed and optimized web interfaces based on UI/UX designs, ensuring aesthetics and responsiveness across multiple devices.
- Built reusable and maintainable components using ReactJS, HTML, CSS, and JavaScript.
- Integrated RESTful APIs from the backend to display and process dynamic data.
- Contributed to projects using Monorepo architecture, managing multiple applications (Next.js frontend, backend API, shared libraries) within a single repository.

DỰ ÁN

Website Bán đồ gia dụng   T3/2025 - T6/2025

FE,BE

- Description: A simple home appliances e-commerce website using HTML/CSS/JavaScript and Node.js (Express). Supports product display, responsive design, basic navigation, and order placement
- Responsibilities:
  - Designed a user-friendly, responsive interface.
  - Implemented ordering flow and page navigation.
  - Built backend with Node.js & Express to serve UI and handle requests.
  - Updated README and provided live demo for recruiters/users.
- Technologies: Frontend (HTML5, CSS3, JavaScript), Backend (Node.js + Express.js)
- **GitHub:** github.com/quando18/home-appliances-store

EXPERIENCE WITH MONGODB & DOCKER

INTERESTS

Energetic, eager to learn, always seeking opportunities for self-improvement. Passionate about exploring new technologies to optimize work and enhance productivity.
